

Schema per branch

יום שלישי 03 מאי 2016
18:07

Create from Current Schema

1 snapshot

2 from snapshot Create A56D1605_MAIN

3 Create user A56D1602TEST_MAIN (hint :Create Like)

4 Create the the tables (A56D1602TEST_MAIN)

From

C:\LogitudeWorld\A56D1605\General\OracleScripts\A56D1602\A56D1602_main(aminetpre).onp

5 do schema diff

From C:\LogitudeWorld\A56D1605\General\OracleScripts\A56D1605\A56D1605_MAIN.onp

To

C:\LogitudeWorld\A56D1605\General\OracleScripts\A56D1602\A56D1602_main(aminetpre).onp

6 Get script and warning

Each warning look at orian if there is rows

Or in migrate script

7 create response

Do on test db A56D1602TEST_MAIN

If there is crash try to fix

And return to step 3

10 add data like

C:\LogitudeWorld\A56D1605\General\OracleScripts\A56D1603\xx_FeaturePackageTypeCode.Sql

11 do logitude update

At the End

Set

```
--INSERT INTO MigrationHistory__ (MigrationId, ContextKey, Model, ProductVersion) VALUES  
( '201605031027337_A56D1605'
```

```
